Heli Tours

Duration	Region	Type
1-3 Hrs	Pokhara, Nepal	Activity

Overview

The scenic beauty of the Himalayan range of Mt. Annapurna is already so mesmerizing and we make it even more wonderful through our Helicopter Mountain Flight. Mount Annapurna (8091m) is surrounded by other 13 peaks over 7000m and 16 mountains over 6000m. In your flight around the Annapurna range you can see the magnificent view of snow-capped mountains like Mt. Annapurna, Mt. Annapurna II and Mt. Dhaulagiri. We will begin our flight from Pokhara flying eastward to the Annapurna Base camp with the panoramic beauty of Himalayan range on your side. We will fly over the trekking trails and beautiful villages around the region to the base camp. In the base camp of the Annapurna Mountain we will spend around 30 minutes enjoying the fresh air and the beauty of the mountains. The panoramic view of the Himalayan range is what makes the Helicopter tour worthy. We will conclude Annapurna Mountain Flight with a return to Pokhara.
